DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14, 30 and 31, drawn to a display containing an acoustic transducer, classified in class 349, subclass 2.
- II. Claims 15-29 and 32-34, drawn to method of manufacturing an acoustic transducer, classified in class 349, subclass 187.

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the acoustic transducer can be made by more conventional means than the powderblasting method as claimed.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
